

Customer: Gouse's Fine Furniture & Interiors

Request: Repair existing ground sign after hurricane damage.

Problem:

Hurricane Irma damaged the face and cap on existing sign.
Permitting did not allow for build back after storm, so repairs were not allowed.
Sign had to be 8 feet or less, but existing sign was much taller.
Applying for a sign variance would be prohibitively expensive and the outcome is not guaranteed.

Solution:

Using existing columns from ground sign, we lowered the sign to legal height.
We installed a double sided sign cabinet in place.

Over the 20+ years that Lykins-Signtek has been serving Southwest Florida we have learned to overcome obstacles that may present themselves. When doing business with our company you will always be in good hands, knowing that we will do whatever it takes to come up with a solution and make you happy.
